Take the Guesswork Out of Sales Tax.

Sales tax is complicated and confusing. Don't waste your time trying to go it alone. AccurateTax makes the sales tax decisions for you, across every jurisdiction in the United States, right in your shopping cart where the sale takes place.

Easy

AccurateTax is easy to use – just drop it into your shopping cart, enter your account information, and you're off running.

Affordable

Our tiered pricing means that you pay based on your usage, so smaller businesses have a lower cost than ones with a higher order volume.

Accurate

You'll find that our tax rates are accurate based on sourcing rules, addresses, product taxability, and other tax rules.

Upfront

We don't charge you a setup fee to start using AccurateTax, and we don't lock you into a long-term contract.

Focused

We are committed to sales tax. You won't find payroll taxes, income tax, or other financial services here. At AccurateTax, we do one thing, and we do it exceptionally well.

Accurate, automatic ecommerce sales tax calculations right in your shopping cart.

If you're an ecommerce retailer but struggle with sales tax, we're here to help. Our easy-to-use sales tax software is designed to eliminate the pain and uncertainty surrounding online sales tax.

AccurateTax TaxTools connects with many major shopping carts. We provide the connector, which you install on your store, and it handles all of the communications between your website and our servers. We then calculate the right sales tax for each order in your store.

Then simply log into your account when it comes time to remit your sales tax, and our easy reports make filing your taxes easy.

Accurate Rates

We provide accurate sales tax rates for every address within the United States. Precise geolocation allows us to pinpoint the right sales tax for every order.

Detailed Reports

Usage reports and transaction details are provided through interactive reports, with the information you need to easily complete sales tax returns.

Address Scrubbing

Our address scrubbing utility takes customer-provided addresses and returns the US Postal Service approved, validated and scrubbed address.

SSTP Support

As a Certified Service Provider, AccurateTax's Enterprise TaxTools fully supports Streamlined Sales Tax Project (SSTP) sellers.

Sales Tax Holidays

TaxTools seamlessly handles sales tax holidays on products such as school supplies, clothing, and emergency preparedness items, according to each state's taxability rules and holiday dates.

Product-Specific Rates

TaxTools completely supports product-specific sales tax country-wide. Some examples are states where groceries aren't taxable, or others where apparel is only taxable above a certain price threshold.

Behind-the-Scenes

Everything happens right in your store. Customers never leave your checkout funnel, and the entire process happens automatically.

Free Trial

Contact us today for your no-commitment, no-hassle free trial and see how AccurateTax can make your sales tax compliance easy.
